Serious medical conditions can go undetected for up to two years—without noticeable symptoms. A blood chemistry wellness test provides the best warning indicator. The earlier a problem is detected, the easier and more likely it is to be treatable. You now have direct access to major clinical laboratory testing across the USA for those important blood chemistry and wellness tests. Many consumers are under-insured, have high deductibles, or health plans without a wellness benefit.

The laboratory services are for informational purposes only. It is not the intention of Direct Laboratory Services, Inc to provide specific medical advice but rather to provide users with information to better understand their health. Specific medical advice including diagnosis and treatment will not be provided. The test results are subject to the same privacy and release restrictions that HIPAA (The Health Insurance Portability and Accountability Act of 1996) places on all medical records. The HIPAA Privacy Rule, protects the privacy of individually identifiable health information. Patients should be aware that test results will not automatically be forwarded to your physician or become a part of office medical records unless you make a specific request. Clients may request to release information to their physician, if they desire. Always seek the advice of a trained health professional for medical advice, diagnosis or treatment.
