

Ultra Therm™ CF (120 Caps)

Stock Number: 3079

Benefits:

- Supports calorie burn throughout the day
- Aids in the break down of body fat
- Caffeine-free

How It Works:

Support Calorie Burn. Combining rhodiola, green coffee bean, green tea and hesperidin with a novel herbal blend, this caffeine-free, thermogenic formula supports calorie burn while aiding your body break down fat. Boost your metabolism and start achieving your weight management goal with Ultra Therm CF today

Ingredients:

Novel herbal blend—this patent-pending combination of two herbs—Sphaeranthus indicus and Garcinia mangostana—may help promote weight loss, especially as fat, when combined with a weight-reduction diet, according to initial research. The extracts are thought to promote fat breakdown and weight loss. Specifically, they may affect levels of adiponectin in the body. Secreted mostly by white adipose tissue, adiponectin levels tend to be lower in individuals who are overweight. Rhodiola root extract—native to high-altitude regions of Europe and Asia, Rhodiola rosea has well documented “adaptogen” properties. Adaptogenic herbs like rhodiola help safely counteract adverse physical, chemical or biological stressors. Study results indicate that rhodiola may improve physical performance and mental capacity, and it promotes a sense of well being. Our extract is standardized to 3% of the active ingred

ient rosin, the amount used in clinical trials. Green coffee bean extract (decaffeinated)—chlorogenic acid, thought to be the active ingredient in safe, caffeine-free green coffee bean extract (Coffea canephora), may help block sugar absorption, promoting satiety and healthy blood sugar levels already in the normal range. In initial studies, taking green coffee bean extract has resulted in weight loss, much of it fat, in overweight individuals. Green tea leaf extract (decaffeinated)—drinking polyphenol-rich green tea (Camellia sinensis) has been linked to good health for centuries. Beyond already-documented benefits for cardiovascular health, brain health and healthy aging, the extract’s active components—including polyphenols such as epigallocatechin gallate (EGCG)—now show promise for weight loss. Researchers believe green tea may have a thermogenic (calorie- and fat-burning) effect

and may inhibit fat absorption. Hesperidin bioflavonoid extract—found in citrus fruit, this phenol promotes blood flow and a healthy inflammatory response by helping support healthy blood vessels.

Recommended Use:

Consume 4 capsules each day, taking 2 in the morning and 2 at lunch. Each bottle contains a 30-day supply.
